Old Accent : don't select this option, unless *purposedly* you want to by-pass step #3 in the rule of precedence (cf. below).

Check Spell : it's best to leave this option always selected;
Scroll down & see the examples given for TELEX VNI VIQR+ VIQR*.

What you want to write and what you must type.				
Notice that <i>as with hand-writing</i> , you can add the accents before (as you type) or after (at the end of each word), or you can even come back and add them later.

The right place of

the Vietnamese accent ⁽¹⁾

--- dans les combinaisons de voyelles, où placer l'accent? ---

John /* When a Vietnamese word has more than 1 vowel, on which vowel is the accent [sắc, huyền, hỏi, ngã, nặng] to go ?
Rule of precedence --> in the presence of

1. "Ơ" ← accent on this vowel
(this includes all "Ơ", "ƯƠ", "ƯƠI", "ƯƠU", + "UƠ") ;
2. "Ê", "Â", "Ô", "Ă", "U" ← accent on this vowel;
(same rule for special vowels, yet "Ơ" has priority) ;
3. "OA", "OE", "OO", "UY" ← accent on 2nd vowel
(this includes also "OAI", "OAY", "OEO") ;
4. Word starts with "GI", "QU" ? accent on next vowel
(examples: giải, giáo, giẻ, giỗ, quả, quẻ, quày, etc.)
5. ELSE accent on whatever vowel comes first
(vowel "A", "E", "I", "O", "U", "Y", is then either alone or first in a combination of 2 vowels) */

SPECIAL NOTE for above step #3 in the rule of precedence :

*Notice how **the position** of the tonal accent doesn't change
(chú ý : vị trí dấu thanh không hề thay đổi)*

UY : accent is on *Y* : túy lúy, quỵ lụy, nguy hiểm, nhụy hoa, huých vai, nguyệt yêu, huyết còi, xe buýt, tuyết soát, huỳnh huych, khuỷu tay...

OA : accent is on *A* : xoá nhoà, hoà hoãn, hoá hoạn, hoạt hoạ, thoát thoát, loáy hoáy, loảng xoảng, ngoáo ộp, ngoảnh nhìn...

OE : accent is on *E* : loè loẹt, nhờ nhờt, oẹ mưa, ngoẹ cổ, nhờn cười....

OO : French words : quần soọc, xe rơ moóc (rờ moọc), kẹo bông bông...

(1) There are five tonal accent marks

sắc [acute], huyền [grave], hỏi [hook], ngã [tilde], nặng [dot-below.]
